eCAS ~ Easy. Essential. Everywhere.
The easy call accounting system that delivers essential information everywhere you need it.

eCAS Highlights:

- * Totally web-based call accounting software for convenient user access from any computer on your network.
- * Easy allocation of telecom usage and equipment costs for up to five levels of organization hierarchy for a single location or six levels for a multi-switch environment.
- * Robust security options, including Windows®-based authentication, complex passwords, SSL (secure socket layer) encryption, and an Audit Trail Report that tracks logins, logouts, and user activities.
- * Powerful reporting engine that provides more than 100 reports featuring drill-down HTML links; column sorting on distributed reports; multiple call types in the same report; and call type summaries, duration filter, and numerous cost center markup options in the organization report.
- * The ability to schedule reports to run automatically at regular intervals and create reports on the fly.
- * Call Alert toll fraud detection to secure your telecom network against unauthorized use and abuse for both incoming and outgoing calls.
- * The convenience of remote call record data collection via modem or your Lan/Wan/Internet.
- * Compatible with traditional PBXs, VoIP switches, or a combination of both.

eCAS Quick Tour (Presentation Video): www.veramark.com/Flash_Demo/

*Not compatible with hotel applications.
